

Codex[®]

AARHUS UNIVERSITY

14 November 2019 5-30pm

“Talent hits a target no one else can hit. Genius hits a target no one else can see.”

Codex together with Aarhus University are proud to curate an event inspired by Leonardo's detailed studies and intricate drawings in his notebooks. The theme of this event will be to examine the impact of polymaths like Leonardo and their importance today.

In the five hundred years since his death, few polymaths have matched the intellect, ingenuity and artistry of Leonardo da Vinci (1452 - 1519). Although more famous for iconic paintings such as The Last Supper and the Mona Lisa, it is in his Codices, where one can really appreciate his expansive vision and unparalleled skills in bridging art, science and technology.

Speakers:

Waqas Ahmed, Author, The Polymath
Is the era of “specialisation” over?

Dr. Jennifer Margaret Galloway, Associate Professor, Aarhus University
What happens when teratonnes of carbon are emitted to the atmosphere?

Rajiv Vaid Basaiawmoit, Head of Sci-Tech Innovation & Entrepreneurship, Aarhus University
What is the Medici Effect?

Surprise speaker to be announced

DRINKS RECEPTION

This event is FREE for Aarhus University Students and Faculty with code CDXLDV.
